#### I. The Need for Recruitment

Effective conservation district programs are built with outstanding and qualified district board members. A district board whose members exhibit a diverse combination of skills will be better able to gain community support for district and local conservation efforts. This reference book provides ideas and methods to recruit district board members that will improve the boards responsiveness to the community they serve.

Some districts have a difficult time replacing a district board member. Other districts might not think recruitment of district board members is a problem, but are willing to prepare themselves for the possibility. While the loss of a respected board member is difficult, the turnover of members can stimulate board activity. Regardless of your district's situation, this book provides a way for the district to decide what it needs in a new district board member(s), and how to develop a strategy to meet these needs through recruitment of new members.

Recruitment of district board members begins with the identification of qualities desired in current and prospective board members, and the definition of roles for all district board members. District boards then develop and use a variety of recruitment strategies to find citizens who have skills and interests compatible with the district. Once found, these citizens are integrated into district programs and activities as elected or appointed board members, associates. Employees, and volunteers. By following the outline in this publication, you can help assure that new district board members not only are interested in conservation, but also have the precise skills that best suit your district's needs. Although the process takes time and energy commitment, a well developed recruitment plan will pay huge dividends in the form of committed and responsible district board members.

Strong boards strive for the diversity of age, ideas and backgrounds to achieve successful program development.

### II. The Importance of Community Outreach

Community outreach is at the heart of building a strong and responsive district program that provides the best possible customer service to the people in your community. An inclusive district board will reflect the ideas and culture of the entire community and allow all to share ideas and feel comfortable coming to the conservation district for assistance. Achieving an effective and inclusive community outreach program does not happen overnight. It takes time, energy and commitment to build a strong and effective district board. Your efforts to include a broad range of community interests should not be driven by outside expectations but instead an internal desire to see all of the people of your community served.

# III. Process to Help You Recruit

## **Analyzing the Needs of Your District**

Before you begin to look for someone to serve as a district board member, your board should first identify what the needs of your district are for human resources. This is an opportunity for your board to expand the membership of the district and to find people that can help the district expand their program.

#### **Recruitment Strategies and Material**

Board member recruitment of qualified and talented individuals requires looking beyond just your current circle of friends, relatives and business associates. It means actively seeking ideas and prospects from outside your inner circle. Local organizations that represent minorities and women should be invited to recommend a candidate based on your district's needs. Your local board should develop a list of potential groups, organizations and individuals to contact when recruiting a new member. **Some examples to consider include:** 

- Community groups that represent minority cultures and women
- Conservation and environmental special interest groups
- People on boards of key organizations banks, charities
- Advertising agencies and marketing firms
- Teachers and college professors
- Researchers and writers
- Accountants, bankers, and investment mangers
- Timber harvesting contractors and professional foresters
- Horticulturists, nursery operators and tree farmers
- Farmers and ranchers
- Hobby and part time farmers
- Former legislators and public board members
- Retired local, state or federal employees
- Consumer activists
- Public relations professionals
- Geologists and engineers
- Professional fund-raisers
- Agronomists and soil scientists
- Economists and social scientists
- Urban interests

A recruitment prospectus (detailed in the next section) should be provided to each entity included on the list developed by your local board.

#### **Identifying Qualities and Qualifications of a District Board Member**

Good district board members need to have a strong conservation ethic, skills and knowledge in conservation, as well as management skills and leadership abilities. Recruitment of potential board members begins with identifying the qualities needed and desired by the local community. District board members should be recruited on the basis of identified qualities and qualifications and not on the criteria of "who's available that we know."

#### Some desirable qualities for district board members would include:

- Open minded
- Strong leadership skills
- Innovative
- Likeable
- Professionalism
- Understands conservation issues
- Good speaking skills

- Progressive
- Always learning
- Fundraising abilities
- Personnel Management
- Legislative understanding skills
- Leadership network in the community

In addition to these, other qualifications to look for could include:

- Individuals that can devote adequate time to the job. Some districts have a written
  policy dictating removal of a board member for a certain number of consecutive
  absences from board meetings.
- Effective communication skills and the ability to get along well with other district board members, staff and assisting agency staff.
- The ability to tolerate the inevitable criticism of leadership. An individual's judgment and integrity are most important.
- The ability to represent their own constituencies and avoid conflicts of interest.

| What additional qualities of | do you want | your district board members to have? |
|------------------------------|-------------|--------------------------------------|
|                              |             |                                      |
|                              |             |                                      |
|                              |             |                                      |
|                              |             |                                      |
|                              |             |                                      |

#### **Recruitment Prospectus**

In order to get people interested in becoming involved with your district, they need to know what the district does and the programs and services it offers. One way to inform prospective members is to develop a recruitment prospectus which may include:

- Mission and vision statements
- Your district's primary goals and objectives
- Legal authority
- Major issues
- Major programs and activities
- Funding sources
- Expectations of district board members
- Benefits of being a district board member

|      | <ul><li>Erosion from cropland</li></ul>   |   |  |  |  |  |  |  |

• Erosion from construction sites

Land users needing technical assistance

#### 6. Major Programs and Activities

- Agricultural cost-share program
- Conservation equipment program
- Tree seedling sales
- Publish quarterly newsletter
- Approval of conservation plans
- Review of county planning proposals
- Educational programs for schools, youth, adult, and civic groups
- Review erosion and sediment control plans.

#### 7. Funding Sources

- Local governments (board of supervisors, city councils, county departments...)
- State government (department of conservation, conservation commission...)
- Grants (district funding raising activities)
- Federal grants, agreements...
- District educational seminars and programs

#### 8. Expectations of Directors

- Take advantage of training opportunities to develop abilities
- Attend board and committee meetings
- Participate in district programs and activities
- Serve as chair of one committee
- Be involved & responsible for district program direction
- Develop policies and programs
- Promote soil & water conservation in the community
- Help manage staff
- Represent district in public
- Help secure financial resources
- Promote district

#### 9. Benefits of Being a Director:

- Being a voice for the citizens of your county/city
- Self satisfaction of providing your time to improve the environment
- Being actively involved with assistance and educational programs for citizens
- Providing leadership in community resource conservation
- Development of leadership skills

### **Recruitment Strategies and Materials**

Once you have identified your district's needs, the qualities of good district board members and have developed a recruitment prospectus and job description, it is time to develop your recruitment strategy. Whether your district has a resignation/retirement, or an election, the following may be helpful in your recruiting efforts.

The sample strategies that follow are only the beginning of what your district can develop. There are advantages and disadvantages to each. Choose the ones that best suit your needs. Ongoing recruitment using a variety of strategies normally produces a greater number of potential nominees who represent more diverse skills, interests and backgrounds.

#### **Sample Strategies**

**Assemble a Board Development Team:** An important first strategy would be to form a board development team charged with responsibility to examine board member needs including recruitment, orientation, and development of board members. The team should include representatives from underserved communities to help identify potential candidates in those communities. The board development team should be broader than a simple nominating committee.

**District Board Members Information Form:** A nomination form describing qualifications the district board has identified can be distributed to organizations in the community.

**Letter to Organizations:** Direct correspondence to organizations, including those representing women and minorities, about potential nominees for district board member positions is an effective way to attract qualified individuals. The letter should include qualifications the board is looking for in potential nominees.

**Public Service Announcements:** Radio and television stations run free public service announcements for community organizations. In many areas of the country there are Spanish-language stations. Many educational channels feature alternative programming in a number of different languages.

**News Releases:** Another method of reaching a wide audience regarding a district board member vacancy is through news releases in newspaper, radio, television and other media.

**Newspaper Advertisements:** Well written and attractive advertisements in newspapers that target underserved populations may help create interest in a district board member position.

**District Recruitment Brochure:** An effective way of informing potential candidates about district programs and activities, and about the powers and authorities of a district board member is through a well developed, clearly written information brochure.

**Recommendations from Staff and Cooperating Agencies:** Staff that have provided direct services to clients are a source of ideas for potential candidates that have qualifications being sought by a district board. Staffs also have contacts throughout the community that may be different from the current board members' contacts

**Recruitment at Annual/Special Meetings:** Make a special point to advertise your annual and special meetings in the media. Keep an attendance list at events to save the names and addresses of people who come.

**Job Description and Recruitment Prospectus Distribution:** Distribute your district board member recruitment prospectus to organizations within the community.

**Personal Contacts:** Personal contacts with a variety of community and organization leaders by district board members can be an effective method to create a pool of candidates different from that of a current circle of friends and relatives. Efforts to personally contact organizations that represent women and minorities could pay off through the development of joint projects between your district and those organizations.

#### **AUDIO**

You may think that soil and water conservation affects only farmers and ranchers but: Idaho's soil and water quality affects the water you drink and the food you eat.

# Soil and Water Conservation District Board Members Help Conserve Our Area's Soil and Water Resources

It may be your child's teacher, a relative, your best friend, or the lady at the grocery store. It may even be your next door neighbor. Who are these people? They're local citizens, an official, elected or appointed, to help develop management strategies regarding local conservation issues.

And, while district board members are elected to four-year terms in general elections, you can also volunteer to serve as an associate member (no election required).

Payment for these positions doesn't come in monetary form, but in the satisfaction of knowing that you are among many others helping your county conserve its natural resources for future generations, your children and grandchildren.

What are the responsibilities of a district board member? To be effective district board member requires more than just attending a meeting. Board members are encouraged to serve on various committees with the state and/or district.

Part of their roles is to educate the public about soil and water conservation. They may help in the development of tours, newsletters, displays, meet with landowners and such. The ways in which district board members can contribute are endless.

In addition, they work closely with the USDA Natural Resource Conservation Service (NRCS), Consolidated farm Services Agency (CFSA), and Idaho Soil Conservation Commission (ISCC), just to name a few.

# Sample District Board Member Election News Release #3

| the USDA Natural Resources Conservation Service (NRCS) are one and the same. This is untrue. While the two often work together within the same office, the district administers programs such as, while the NRCS provides technical assistance and guidance to complete best management practices.   |
|--|
| So look around you. The conservation practice in the field near you may belong to a district board member or cooperator. District board members practice what they preach, and usually have farms and/or land to prove it, plus the satisfaction that they are helping to make changes for the good of all the citizens of the (name) Conservation District. |
